

Gardini G., 2010 - *Boromorphus italicus* n. sp. dell'Italia meridionale (Coleoptera, Tenebrionidae). *Doriana*, 8 (368): 1-12

Abstract: *Boromorphus italicus* n. sp. (male, female; loc. typ.: Italy, Calabria, Aspromonte, Africo Nuovo) is described and related to *B. tagenioides* (Lucas, 1846) from Southern Spain, Madeira and N-Africa; the genus is new for the Italian fauna. A key to the species of *Boromorphus* Wollaston, 1854 is proposed (*B. lineellus* Fairmaire, 1893 excepted) and the aedeagi of the known species are drawn.
