## Abstract

An account of the Antonio Giordani Soika Eumeninae collection housed at the Natural History Museum of Venice Giancarlo Ligabue is presented, following its recent reorganization. A list of identified species, with the count of specimens, is provided, as well as details on type specimens. With over 21,000 identified specimens and 2,756 type specimens from all zoogeographical regions, the collection covers over 60% of the world's Eumeninae species. Several incongruities emerged during the verification of type specimens. A brief history of the collection is presented, with comments on Giordani Soika's activity.

**Key words:** Antonio Giordani Soika, Catalogue, Collection, Vespidae, Eumeninae

## Introduction

Antonio Giordani Soika (1913–1997), director of the Natural History Museum of Venice Giancarlo Ligabue (MSNVE), Italy, between 1946 and 1978, was an eclectic naturalist and an eminent entomologist, chiefly devoted to taxonomy (Ratti 1999). During his prolific scientific life, spanning from 1930 to 1996, he introduced 105 genus-level and 1,465 species-level names (Borsato & Ratti 1999). Aside from a few papers on different groups of insects (Coleoptera, Diptera, e.g., Giordani Soika 1937b, 1956) and crustaceans (e.g., Giordani Soika 1950, 1952), the bulk of his taxonomic activity addressed the family Vespidae, especially members of the subfamily Eumeninae, for which the new taxa described by AGS account for 102 genus-level and 1,346 species-level names.

During his life, AGS formed an important worldwide collection of Eumeninae, the largest part of which is now housed at the MSNVE. Due to the collection's arrangement, or lack thereof, the material has been difficult to study.

Following an inventory of type specimens, and then a complete reordering, the condition of the collection has greatly improved in the last decade. It is now fully indexed and accessible. The present paper offers a brief account on the reorganization process of the collection and provides a list of the species and type specimens contained therein.

## Material and Methods

**Taxonomic references.** Nomenclature of all identified specimens and of all type specimens was checked against a world taxonomic checklist, partly built on published data (Carpenter *et al.* 2009, 2010a, 2010b; Nugroho *et al.* 2012; Nguyen *et al.* 2014; Rafi *et al.* 2017; Tan *et al.* 2018; Rahmani *et al.* 2020; Carpenter & Gadallah 2020; Gawas *et al.* 2020; Carpenter & Brown 2021) and partly based on unpublished work (JMC, unpublished).

**Rearrangement of the collection.** An initial survey, tracking, and inventory of type specimens was carried out by MU during the years 2007–2009. Starting from 2016, the collection underwent a thorough rearrangement, which was carried out mostly by DDP, under the supervision of MU.

The process started by numbering the original drawers and photographing the systematically arranged ones for archiving purposes. Those with miscellaneous, unidentified, or chaotically arranged materials were not photographed, as no labels would have been readable. Subsequently, we took note of the identified specimens contained in each

drawer, verifying their declared identification against the current nomenclature and taxonomy, and updating it whenever necessary. The whole collection was then rearranged from scratch based on the checklist of species previously compiled, and on the complete tracking of all specimens. For each species, conspecific specimens - often scattered across different drawers - were gathered into definitive drawers. During the rearrangement, the material was also split according to the five main biogeographical regions. For species occurring across different regions, all specimens were grouped in the region containing the largest part of the known range.

While nomenclature and taxonomy were verified and updated, the same was not done for the identification of specimens: the accepted identity of each specimen is hence the one declared by the original identification labels or retrieved by the former arrangement of specimens done by AGS. A few hundred specimens, however, have been identified or revised by specialists in recent years.

As our work aimed to improve scientific usability of the collection, it was impossible to retain the original header labels with species names, mostly typewritten, either glued or pinned to the bottom of drawers. We considered these labels a mere tool for collection arrangement and organization, rather than a relevant part of the scientific legacy of AGS. Aside from their obsolete nomenclature, any action such as pinning determination labels beneath a specimen or adding specimens from elsewhere to the original array following each header label, was avoided, as it would result in an alteration of the original application of the labels themselves. All labels pinned under the specimens were, obviously, preserved.

Unidentified specimens (including those identified at the genus level only) remaining after the completion of the above process were separately grouped according to the biogeographical region.

The whole process required about 900 hours, of which about 250 were dedicated to genitalia restoration (see below).

**Genitalia reconstruction.** Giordani Soika used to mount dissected genitalia on glass coverslips that were glued onto cardboard and either pinned under (or beside) the specimen or stored in separate drawers, associating them to the correct specimen using a symbol or a code. On such coverslips, anatomical parts were embedded in a water-soluble mounting medium, presumably Faure liquid, and left uncovered.

Over time, the mounting medium cracked, and the large majority of the embedded genitalia detached from the glass, falling, and mixing together on the bottom of the drawer. Since a single drawer would often contain several detached and fragmented genitalia embeddings (Figs 1–2), a thorough reconstruction process was undertaken, by means of matching the cracked margins of the detached parts of each slide with the peripheral portions still attached to the glass (Figs 2–3). In rare cases, original wrong attributions by AGS were detected (e.g., a single mount with duplication of the same anatomical part); these were preserved as such.

Once reassigned to the correct specimen or slide, the original preparations were dissolved in water and embedded in DMHF (dimethylhydantoinformaldehyde), which is also water-soluble (Liberti 2005), on entomological mounting cards pinned under the appropriate specimen (Fig. 5).

**Databasing.** A Microsoft Access database specifically designed by one of us (MU) and stored on a MSNVE server was used to store basic information such as the list of species, the number and the sex of specimens, the placement in the collection (cabinet and drawer), and the presence of types. The compilation of species present in the collection was done by marking names of taxa on a previously digitized world checklist, in order to minimize the risk of typos.

For type specimens, information on the type status, the original description, the collecting country, and the actual status were also noted.

**Type specimens.** By “type specimen(s)” we refer to any specimen belonging to the type series, as defined by ICZN (1999: Article 72.4 and Glossary). Allotypes, whose designation is not regulated by ICZN (see ICZN 1999: Recommendation 72A and Glossary), were retained in the list of type specimens only when belonging (or believed to belong) to the type series, thus having – from the strictly nomenclatural point of view – the status of paratypes or of syntypes (see ICZN 1999: Article 72.1). The correct identification and repository of all holotypes and lectotypes found was checked against their original description, in order to evaluate whether the type status of each of them was correctly recognized and the specimens properly held by MSNVE. We considered the primary types as belonging to the institution or collection declared as official repository in the original description of the taxon, or in the paper where AGS designated or clarified the status of his name-bearing specimens (Giordani Soika 1973).

The same treatment was not applied to paratypes: the large number of ancient specimens, and the frequent omission of their repository or precise number by AGS, as well as many other old authors, would make such a task almost impossible to accomplish, and beyond the aim of this work.

Treatment of the incongruities that emerged during the cross-check of specimens and literature is given in the Results section.

**Historical information.** Basic information on the history of the collection was gathered browsing unpublished documents and files preserved at the MSNVE, including the AGS correspondence, which is preserved in the library.

## Results

**The Antonio Giordani Soika Eumeninae collection: brief historical notes and original status.** Although mostly built during the years of his activity at the MSNVE, the Hymenoptera collection was the personal property of AGS. This is confirmed by several papers where AGS referred to it as “mia collezione” [=“my collection”] (e.g., Giordani Soika 1965: 15, 1976: 157, 1985: 40), or listed it among several others institutional collections as “Coll. A. Giordani Soika, Venezia”, (rather than as “the collection of Natural History Museum of Venice”) (e.g., Giordani Soika 1970: 27, 1973: 7, 1975: 111).

The collection was composed of materials collected by AGS himself, specimens he personally bought from collectors (which is testified by various documents preserved at MSNVE among his correspondence), materials he was allowed to keep from other institutions as a reward for his identification work (e.g., the NHM London allowed him to retain a total of 1,326 specimens, G. Broad, pers. comm.), and exchanges and donations received by other workers (among others, material from the collection of his friend Alberto Mochi, who himself bequeathed it to AGS).

The AGS collection was acquired by MSNVE/Venezia municipality in three distinct episodes, each dealing with a distinct batch of materials.

- The first, and largest part was donated by AGS at the time of his retirement (1978) and formally accepted by the Venice Municipality in 1983. This collection counted 387 entomological drawers (26x19 cm) containing 28,480 wasp specimens (including 2,024 paratypes).
- The second part was donated by AGS in 1995, consisting of 50 entomological drawers and about 1,420 specimens belonging to 346 species.
- The third and last part was bought by the MSNVE after the death of AGS, from his wife and heiress Gioiella d’Este, in 1998. This part consisted of 148 drawers containing over 10,000 identified specimens belonging to 1,830 species. Included were: 201 holotypes, 4 lectotypes, 4 cotypes, 75 allotypes and 1,239 paratypes.

Apart from the material housed at the MSNVE, according to Guichard (1980), we are aware that “a recently acquired portion (Western Palaearctic) of the G. Soika collection, with much type material” is housed at the Natural History Museum of London. This information is confirmed by correspondence between AGS and M.C. Day, who at that time was curator of Hymenoptera at BMNH and handled the purchase of this part of the collection. However, we were unable to find any additional information about the nature or number of these specimens, and even colleagues from London could not shed additional light on the matter (G. Broad, pers. comm.). To our knowledge, this is the only information available about material from the AGS collection that is preserved outside the MSNVE.

The donation of his own material to the museum was carried out by AGS in exchange for some benefits, including the agreement to keep his office at the MSNVE in pursue of his taxonomic activity, and the management of his own collections, which were incremented throughout the time. Despite this intense work, which lasted until the very final days of his life, what was left at MSNVE after AGS death, firstly under the curatorial activity of Enrico Ratti, and subsequently (2007 onwards) of one of us (MU), was quite far from being a well-ordered collection. The precious material was housed in about 800 small-sized entomological drawers (19x26 cm), of which 530 contained Eumeninae vespids.

In the Eumeninae collection, the arrangement of specimens ranged from rather well-ordered (Figs 6–8) to chaotic. In the ordered part, the systematic arrangement was repeated three times, one for each separately acquired

batch, hence, even among originally ordered materials, the same taxon could have been located in three different drawers. Moreover, labels with name of species not associated with any specimens were scattered in abundance across this whole ‘systematic section’, and placed above more or less large empty spots, either as placeholder for specimens that were never added or as remnant for specimens that were removed (Figs 7–8). Batches of drawers containing unsorted specimens, either identified (Fig. 9), unidentified, or the two mixed together, were found scattered across the whole collection, as well as drawers with external labels not, or not fully, corresponding to the content, in particular among the “miscellaneous section”. Due to this situation and to the lack of any catalogue, loan requests received by MSNVE over the years have been sometimes impossible to dispatch, as the requested materials turned out to be untraceable or requiring particularly time-consuming searches.

**The Antonio Giordani Soika Eumeninae collection reorganized.** As of July 1, 2021, the Giordani Soika Eumeninae collection housed at MSNVE hosts 21,382 identified specimens belonging to 2,775 valid species-level taxa (species and subspecies), thus covering over 60% of the currently recognised world Eumeninae diversity. The collection, which was originally occupying 530 drawers, is now reduced to 282 drawers, of which 249 contain identified specimens, 30 contain unidentified ones, and 3 contain specimens labelled as types, but never described, thus representing unpublished names of about 80 purportedly new taxa. Two examples of rearranged systematic drawers are shown in Figs 10–11.

A breakdown of collection numbers for the different biogeographical regions is presented in Table 1. The state of preservation is in general very good, with no relevant signs of deterioration. No significant activity of restoration was therefore required, except for the remounting of all dissected genitalia (see under Material and Methods), totaling 480 mounts. About 50 of these could not be reassigned to a specimen, although associated to label data and/or to a code. Only a few fragments of mounting medium containing anatomical parts could not be matched to a broken mount.

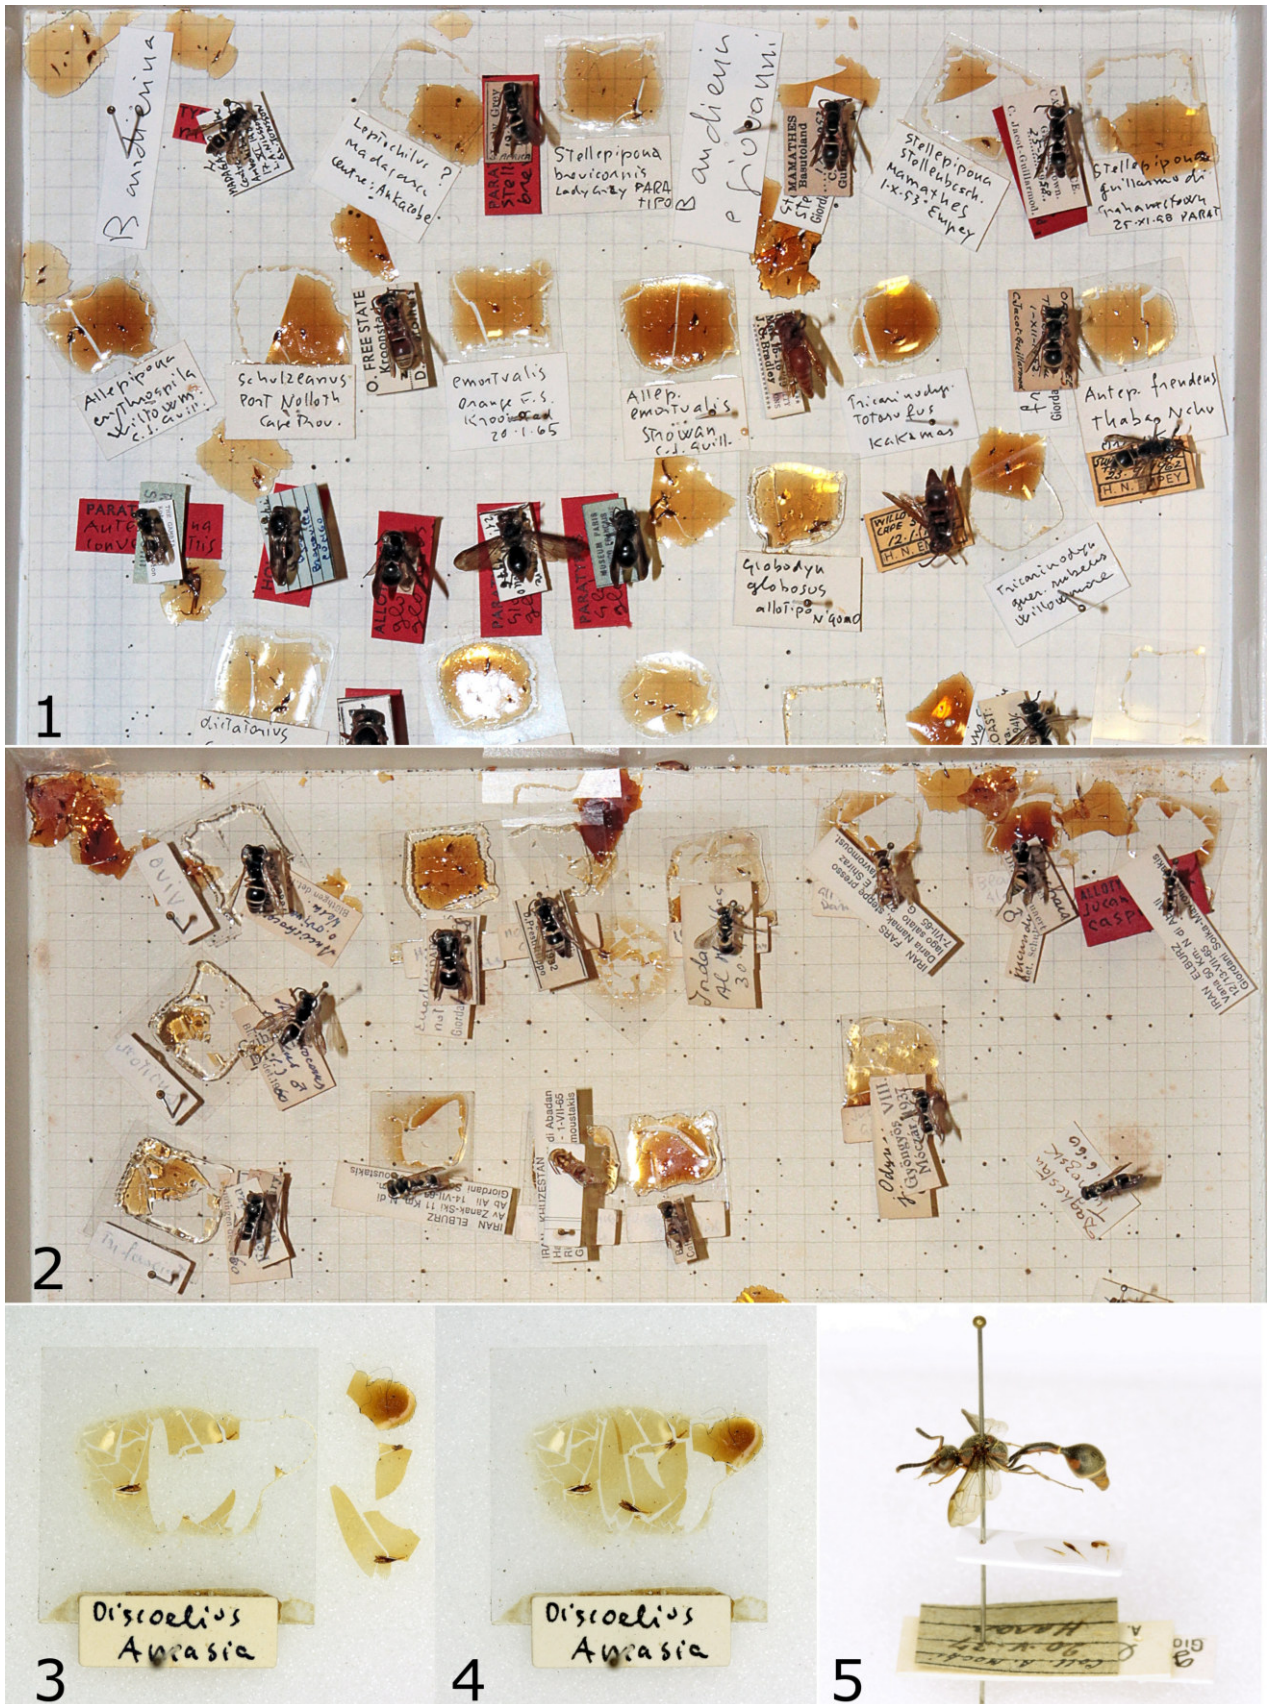

**TABLE 1.** Arrangement and content of the A. Giordani Soika Eumeninae collection after the reorganization, breakdown of materials according to biogeographical regions.

	Nearctic	Neotropical	Palearctic	Afrotropical	Oriental	Australian
Drawers, systematic collection	16	36	78	63	41	15
Drawers, unidentified materials	2	13	5	7	1	2
Identified species and subspecies	212	419	805	656	482	201
Identified specimens	1129	2824	7777	5668	3165	819

In addition, the reassessment of unidentified miscellaneous materials led to the identification of many specimens clearly belonging to other institutes, which remained for long time at the MSNVE as unreturned loans and were not included in previous counts. This material, which was originally contained in 46 drawers, is progressively being returned to the legitimate owners.

**Type specimens.** The collection contains a total of 2,756 type specimens, belonging to 1,281 nominal taxa, of which 1,145 are considered valid and 130 are considered synonyms. Of these, 301 are holotypes, 49 are lectotypes, 51 are syntypes belonging to 36 taxa, 120 are allotypes, and 2,231 are paratypes or paralectotypes belonging to 1,013 taxa. Type specimens amount to 12.8% of the whole collection and are spread across 40.7% of the valid taxa contained therein.

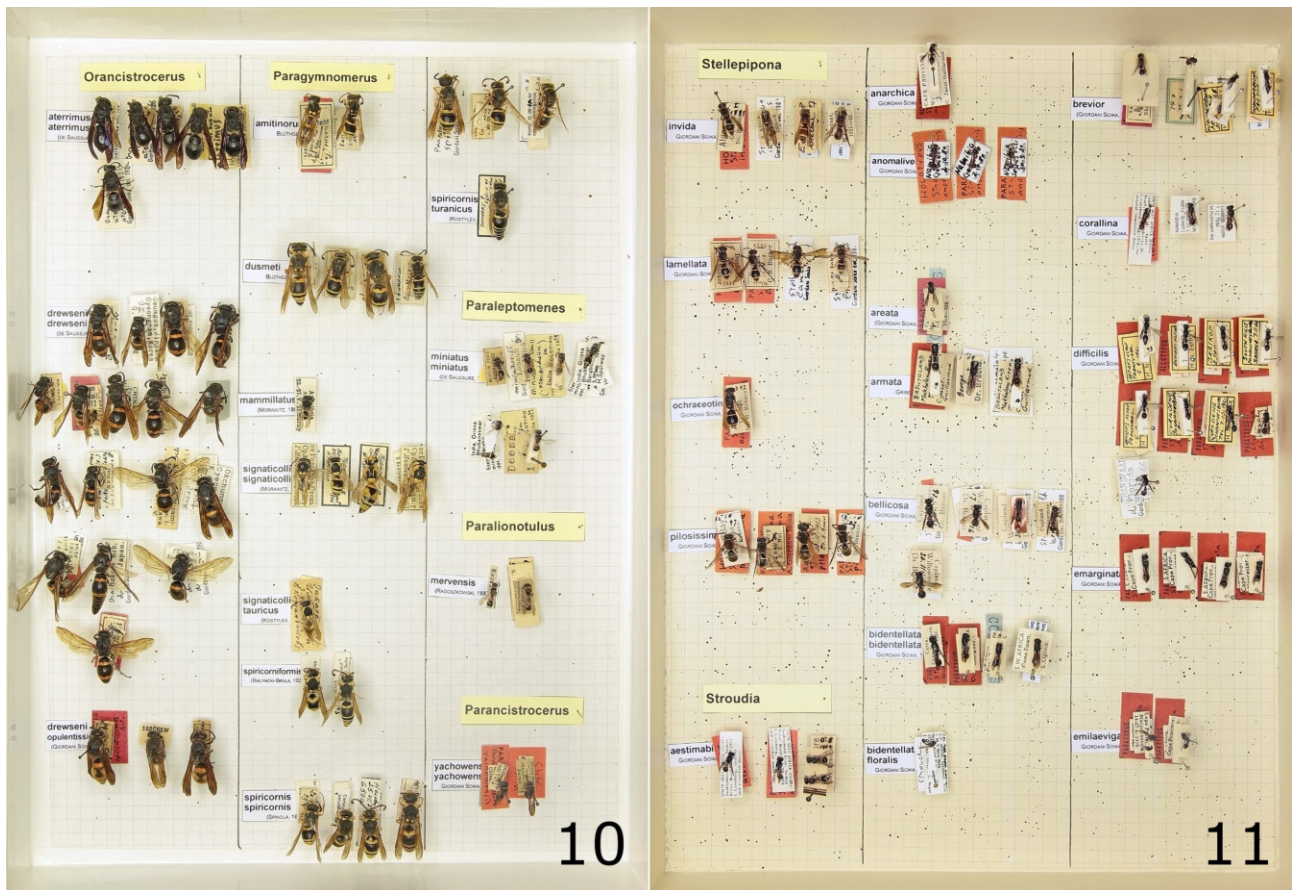

Several incongruities emerged during the verification of type specimens, partly because AGS treated or designated type specimens according to a personal view not fully complying with ICZN rules. Among problems encountered are duplication of holotype or allotype, labelling as paratypes specimens not included in the original description (sometimes even collected after the original description), and labeling as paratypes ancient syntypes, obtained from historical museum collections. Although we did not focus on the verification of the status of each specimen (except primary types, see Material and Methods), we could spot dozen of such incongruities, which

**FIGURES 1–2.** The collection AGS before reorganization and restoration. Details of drawers with genitalia mounts detached from the glass and mixed at the bottom. **FIGURES 3–4.** A step in the process of genitalia restoration: associating detached fragments of mounting medium to their original coverslip by matching margins of the damaged mount. **FIGURE 5.** Genitalia remounted in DMHF after restoration.

FIGURES 6–9. The collection AGS before reorganization. 6: a well-ordered drawer; 7–8: well-ordered drawers, with large empty areas and labels as placeholders for missing specimens; 9: drawer with miscellaneous unsorted identified specimens.

**FIGURES 10–11.** Two drawers from the collection AGS after the reorganization. 10: Palaeartic fauna, drawer 59; 11: Afro-tropical fauna, drawer 49.

augment others noted by previous workers. In these cases, an explanatory label has been appointed under the specimen, that has subsequently been removed from the catalogue of type specimens here presented. It should be acknowledged that other unidentified cases could possibly be present, whose assessment requires a thorough revisionary work.

The status of syntypes labeled as paratypes was only partly resolved. The correct interpretation of such specimens, definitely belonging to the original type series, was difficult to assess, and the fact that they could still be syntypes or have become paralectotypes following the designation of a lectotype, represents an issue that is beyond the scope of the current work. Their precise status shall therefore be verified in future taxonomic treatments.

Following the verification of correct type depository, several primary types were found to belong to different institutions, to which they are now being progressively returned.

We also noted that some type specimens expected to be present in the AGS collection are missing, including specimens other than those from the Palaeartic fauna that were presumably moved to London (see Guichard 1980). In particular, we could not find any type specimens for 17 out of 18 Malagasy species or subspecies described by AGS during the period 1934–1941 (Giordani Soika 1934, 1937a, 1941). For all of these, holotypes or lectotypes, often with paratypes or paralectotypes, were expressly stated to be preserved in his collection as confirmed by AGS in the catalogue of his own types (Giordani Soika 1973), but we could not find any, nor we have any clue about their destiny. The only exception is represented by five paralectotypes of *Antepipona lemuriensis* (Giordani Soika 1941). Unfortunately, in this case the lectotype is also missing.

**Access to collections.** The tracking of specimens and species, and the subsequent rearrangement of the collection, dramatically improved the ease of browsing materials, and helped us to locate the most relevant specimens such as types, unidentified specimens, and unpublished names.

During the last 10 years (2011–2020) the progressive removal of conditions that hindered access to the materials

allowed the issue of 20 loans to 9 Eumeninae taxonomists, totalling 1,730 specimens that have been moved for study, comparison, identification, or re-identification. In the same period, 34 new species have been identified based solely (24 species) or partly (10 species) on the material of this collection (Cooper 2013, 2014; Ferreira *et al.* 2016; Garcete-Barrett 2011; Selis 2016, 2017a, 2017b, 2018, 2019, 2020a, 2020b; 5 additional new species are currently in press). Of these, 24 have been published or identified in the last three years (2018–2020), *i.e.* after the completion of the process of tracing of specimens that was concluded in 2017.

## Acknowledgements

We thank Alberto Ballerio (Brescia, Italy) for nomenclatorial advice, and Gavin Broad (NHMUK, UK) and Marco Selis (Viterbo, Italy) for their friendly assistance. We are grateful to Marcel G. Hermes (Universidade Federal de Lavras, Brazil) and Kevin A. Williams (CDFA, California, USA) for reviewing and improving the manuscript. DDP would like also to thank all the staff of the MSNVE for their friendship and support over the years in which DDP physically worked on the collection; a special thank goes to Giacomo Masato for facilitating access to the MSNVE library, and for the many profound intellectual discussions.

## Appendix A

### Checklist of species

A checklist of all identified and currently valid species and subspecies contained in the AGS collection is provided below.

The species name is followed by the number of males and females (type specimens included), and the number and designation of type specimens belonging to the nominal taxon. Tribes and species are listed in alphabetical order.

Abbreviations of tribes: Eum: Eumenini, Ody: Odynerini, Zet: Zethini.

Abbreviations of types: AT: allotype, HT: holotype, LT: lectotype, PLT/PLTs: paralectotype/s, PT/PTs: paratype/s, ST/STs: syntype/s. \* = incertae sedis

Tribe	Taxon	Authorship	♂	♀	Name-bearing types	Other types
Eum	<i>Afreumenes aethiopicus aethiopicus</i>	(de Saussure, 1852)	22	25		
Eum	<i>Afreumenes aethiopicus affinis</i>	(von Schulthess, 1910)	1	4

## Appendix B

### Checklist of type specimens

A checklist of type specimens contained in the AGS Eumeninae collection is provided below.

Names are listed in alphabetical order according to their original spelling and combination (original subspecific designations such as “ssp.” “var.” and “ssp.” are omitted) and are accompanied by their current taxonomic and nomenclatorial treatment, the number and designation of types, and few necessary notes.

See discussions on “Type specimens” both in “Material and methods” and “Results” sections for notes on the our treatment of types and application of type labels by AGS.

Abbreviations. AT: allotype, HT: holotype, LT: lectotype, PLT/PLTs: paralectotype/s, PT/PTs: paratype/s, ST/STs: syntype/s.

1PT	<i>Abispa (Parabispa) ruficornis</i> van der Vecht, 1960
AT	<i>Abispa maculicollis</i> Cameron, 1911 Currently treated as <i>Abispa (Abispa) splendida maculicollis</i> Cameron, 1911
2PT	<i>Acanthodynerus giordanii</i> Gusenleitner, 1969
HT, 6PT	<i>Acarepipona insolita</i> Giordani Soika, 1985 Currently synonym of <i>Allodynerus curvirufolineatus curvirufolineatus</i> (Cameron, 1910)
1PT	<i>Acarepipona pervigilans obscura</i> Giordani Soika, 1989 Currently treated as <i>Allodynerus curvirufolineatus obscurus</i> (Giordani Soika, 1989)
1PT	<i>Acarodynerus acarophilus</i> Giordani Soika, 1962
1PT	<i>Acarodynerus atrorufus</i> Giordani Soika, 1993
AT, 3PT	<i>Acarodynerus denticulatus</i> Giordani Soika, 1962
AT, 1PT	<i>Acarodynerus legatus</i> Giordani Soika, 1977
1PT	<i>Acarodynerus lunaris</i> Giordani Soika, 1977
1PT	<i>Acarodynerus paleovariatus</i> Giordani Soika, 1962
AT, 1PT	<i>Acarodynerus quadrangolum</i> Giordani Soika, 1977
1PT	<i>Acarodynerus queenslandicus</i> Giordani Soika, 1962
1PT	<i>Acarodynerus spectrum</i> Giordani Soika, 1962
1PT	<i>Afrepipona lamptoensis</i> Giordani Soika, 1965 Currently synonym of <i>Afrepipona angusta</i> (de Saussure, 1863)
2PT	<i>Afreumenes aethiopicus longitudinalis</i> Giordani Soika, 1968
5PT	<i>Afreumenes aterrimus pseudomelanosoma</i> Giordani Soika, 1968
3PT	<i>Afreumenes melanosoma ealensis</i> Giordani Soika, 1968
1PT	<i>Afreumenes moseri bidimidiatus</i> Giordani Soika, 1968
3PT	<i>Afreumenes nigrorufus</i> Giordani Soika, 1968
6PT	<i>Afreumenes violaceus paramelanosoma</i> Giordani Soika, 1968
9PT	<i>Afreumenes violaceus rugosopunctatus</i> Giordani Soika, 1968
2PT	<i>Afreumenes violaceus trifasciatus</i> Giordani Soika, 1987
AT, 3PT	<i>Afrogamma gibbosum</i> Giordani Soika, 1987
HT, AT	<i>Afroxanthodynerus baidoensis</i> Giordani Soika, 1989 Currently treated as <i>Xanthodynerus baidoensis</i> (Giordani Soika, 1989)
HT	<i>Alastor (Alastor) brevicornis</i> Selis, 2020
HT	<i>Alastor (Alastor) carens</i> Selis, 2020
HT	<i>Alastor (Alastor) gestroides</i> Selis, 2020
1PLT	<i>Alastor (Alastor) guichardi</i> Giordani Soika, 1958 Currently treated as <i>Alastor (Alastorellus) guichardi</i> Giordani Soika, 1958
AT	<i>Alastor (Alastor) maidli</i> von Schulthess, 1925 Currently treated as <i>Astalar maidli</i> (von Schulthess, 1925)
HT	<i>Alastor (Alastor) moody</i> Selis, 2020
HT	<i>Alastor (Alastor) namibiensis</i> Selis, 2020
HT, 1PT	<i>Alastor (Alastor) parilis</i> Selis, 2020

HT	<i>Alastor (Alastor) sabrinae</i> Selis, 2020
HT, 1PT	<i>Alastor (Alastor) temperatus</i> Selis, 2020
HT	<i>Alastor (Alastorellus) carinulatus</i> Giordani Soika, 1991
HT, AT	<i>Alastor (Alastorellus) cylindricus</i> Giordani Soika, 1991
AT	<i>Alastor (Alastorellus) madecassus</i> Giordani Soika, 1991
1PLT	<i>Alastor (Alastorellus) mandibularis</i> Giordani Soika, 1950
HT	<i>Alastor (Alastorellus) nigroflavus</i> Giordani Soika, 1991
HT	<i>Alastor (Alastorellus) planipunctus</i> Selis, 2020 Note. Highly damaged specimen.
HT	<i>Alastor (Alastorellus) plicatus</i> Giordani Soika, 1991
1PLT	<i>Alastor (Antalastor) concitatus</i> Giordani Soika, 1934 Currently treated as <i>Alastor (Alastor) concitatus</i> Giordani Soika, 1934
LT	<i>Alastor (Antalastor) conicus</i> Giordani Soika, 1950 Currently synonym of <i>Alastor (Alastorellus) sulcifer</i> Giordani Soika, 1934
2PT	<i>Alastor (Antalastor) exornatus</i> Giordani Soika, 1934 Currently synonym of <i>Alastor (Alastor) promontorii</i> Meade-Waldo, 1913
1PLT	<i>Alastor (Antalastor) globosus</i> Giordani Soika, 1934 Currently treated as <i>Alastor (Alastor) globosus</i> Giordani Soika, 1934
HT	<i>Alastor (Antalastor) minutepunctatus</i> Giordani Soika, 1950 Currently synonym of <i>Alastor (Alastor) bucida</i> de Saussure, 1853
LT, 1PLT	<i>Alastor (Antalastor) persimilis</i> Giordani Soika, 1950 Replaced by <i>Alastor (Alastorellus) simillimus</i> Giordani Soika, 1983
1PLT	<i>Alastor (Antalastor) procax</i> Giordani Soika, 1934 Currently treated as <i>Alastor (Alastor) procax</i> Giordani Soika, 1934
1PLT	<i>Alastor (Antalastor) ricae</i> Giordani Soika, 1934 Currently treated as <i>Alastor (Alastor) ricae</i> Giordani Soika, 1934
1PLT	<i>Alastor (Antalastor) schulthessianus</i> Giordani Soika, 1934 Currently treated as <i>Alastor (Alastorellus) schulthessianus</i> Giordani Soika, 1934
4PT	<i>Alastor (Megalastor) schwarzi</i> Gusenleitner, 1967
HT	<i>Alastor aeger</i> Giordani Soika, 1983
AT	<i>Alastor bilaminatus</i> Giordani Soika, 1942 Currently synonym of <i>Alastor (Alastor) bilamellatus</i> Giordani Soika, 1941
HT, 3PT	<i>Alastor bispinosus</i> Giordani Soika, 1983
1PT	<i>Alastor braunsi</i> Meade-Waldo, 1913
8PT	<i>Alastor dalyi</i> Giordani Soika, 1979
1PLT	<i>Alastor faustus</i> Giordani Soika, 1941
HT, 1PT	<i>Alastor kochi</i> Giordani Soika, 1983
1PLT	<i>Alastor mediomaculatus</i> Giordani Soika, 1952
1PT	<i>Alastor promontorii</i> Meade-Waldo, 1913
1PT	<i>Alastor pronotalis</i> Giordani Soika, 1983
HT	<i>Alastor quadraticollis</i> Giordani Soika, 1941
HT, AT, 2PT	<i>Alastor schulthessianus baidoensis</i> Giordani Soika, 1983 Currently treated as <i>Alastor (Alastorellus) baidoensis</i> Giordani Soika, 1983
1PT	<i>Alastor submissus</i> Giordani Soika, 1983
1PT	<i>Alastor zoroaster</i> Gusenleitner, 1986
AT, 1PT	<i>Alastorynerus wolffi</i> Giordani Soika, 1974 Currently synonym of <i>Micreumenes (Alastorynerus) rubescens</i> Gusenleitner 1973
HT, 10PT	<i>Allepipona (Allepipona) erythrospila lesothensis</i> Giordani Soika, 1987
8PT	<i>Allepipona (Allepipona) erythrura</i> Giordani Soika, 1987
4PT	<i>Allepipona (Allepipona) perspicax</i> Giordani Soika, 1987
1PT	<i>Allodynerus laticypeus</i> Giordani Soika, 1972
1PT	<i>Allodynerus mandschuricus</i> Blüthgen, 1953

- 1PT *Allodynerus vinciguerrae pallidulus* Giordani Soika, 1970
- 1PT *Allorhynchium anomalum* Giordani Soika, 1992
- 2PT *Allorhynchium argentatum tigrinum* van der Vecht, 1963  
Currently treated as *Allorhynchium tigrinum tigrinum* van der Vecht, 1963
- HT, AT *Allorhynchium concolor atripenne* Giordani Soika, 1986  
Currently treated as *Allorhynchium tigrinum atripenne* Giordani Soika, 1986
- 1PT *Allorhynchium concolor* van der Vecht, 1963
- 7PT *Alphamenes campanulatus gladiator* Giordani Soika, 1978  
Currently synonym of *Alphamenes campanulatus* (Fabricius, 1804)
- 3PT *Alphamenes campanulatus luctuosus* Giordani Soika, 1978  
Currently synonym of *Alphamenes campanulatus* (Fabricius, 1804)
- HT *Alphamenes insignis loquax* Giordani Soika, 1978  
Currently synonym of *Alphamenes richardsi* Giordani Soika, 1978
- 2PT *Alphamenes insignis richardsi* Giordani Soika, 1978  
Currently treated as *Alphamenes richardsi* Giordani Soika, 1978
- 10PT *Alphamenes semiplanus* Giordani Soika, 1978
- HT, AT *Ancistrocerus (Ancistrocerus) agilis novaeguineae* Giordani Soika, 1941  
Currently treated as *Pararrhynchium agilis novaeguineae* (Giordani Soika, 1941)
- 3PLT *Ancistrocerus (Ancistrocerus) andreinii* Giordani Soika, 1939
- 1PT *Ancistrocerus (Ancistrocerus) atlanticus atrurus* Giordani Soika, 1941
- 1PLT *Ancistrocerus (Ancistrocerus) egidae* Giordani Soika, 1936  
Currently treated as *Eustenancistrocerus (Eustenancistrocerus) egidae* (Giordani Soika, 1936)
- 1PLT *Ancistrocerus (Ancistrocerus) lineaticollis stevensoni* Giordani Soika, 1936  
Currently treated as *Ancistrocerus neuvillei stevensoni* Giordani Soika, 1936  
Note. The identification label mentions “stevensoni” only.
- 2PLT *Ancistrocerus (Parancistrocerus) nitidissimus* Giordani Soika, 1936  
Currently treated as *Convextrocerus nitidissimus* (Giordani Soika 1936)
- 3PLT *Ancistrocerus (Subancistrocerus) monsticornis* Giordani Soika, 1941  
Currently treated as *Subancistrocerus monsticornis* (Giordani Soika, 1941)  
Note. One specimen with gaster detached and glued on label.
- 1PT *Ancistrocerus abditus* Gusenleitner, 1977
- 1PT *Ancistrocerus arcanus* Giordani Soika, 1993
- 1PT *Ancistrocerus atlanticus lindbergi* Giordani Soika, 1966
- 3PT *Ancistrocerus atlanticus pseudatlanticus* Giordani Soika, 1966
- 2PT *Ancistrocerus aureovillosus* Giordani Soika, 1977
- 1PT *Ancistrocerus beieri* Giordani Soika, 1960
- HT, 1PT *Ancistrocerus borneanus* Giordani Soika, 1996
- AT, 7PT *Ancistrocerus cervus* Giordani Soika, 1974
- 1PT *Ancistrocerus claripennis ponticus* Giordani Soika, 1970
- 2PT *Ancistrocerus contrarius alboquadrinaculatus* Giordani Soika, 1966
- 2PT *Ancistrocerus contrarius* Giordani Soika, 1966
- 2PT *Ancistrocerus fasciaticollis flavocaudatus* Giordani Soika, 1974
- AT, 7PT *Ancistrocerus fasciaticollis* Giordani Soika, 1974
- 1PT *Ancistrocerus ferrugineoclypeatus* Giordani Soika, 1960
- HT, AT, 2PT *Ancistrocerus flaviventris* Giordani Soika, 1986  
Currently synonym of *Ancistrocerus kitcheneri* (Dusmet, 1917)
- LT *Ancistrocerus fukaianus opulentissimus* Giordani Soika, 1941  
Currently treated as *Orancistrocerus drewseni opulentissimus* (Giordani Soika, 1941)
- 6PT *Ancistrocerus haematodes antelucanus* Giordani Soika, 1974
- 1PT *Ancistrocerus hirsutus khambensis* Giordani Soika, 1977
- 2PT *Ancistrocerus impunctatus cyrenaicus* Giordani Soika, 1977
- HT, 1PT *Ancistrocerus kenyaensis* Giordani Soika, 1974

- HT, 4PT *Ancistrocerus kenyaensis maximus* Giordani Soika, 1974
- 1PT *Ancistrocerus khangmarensis* Giordani Soika, 1966
- 2PT *Ancistrocerus krausei* Giordani Soika, 1966
- 4PT *Ancistrocerus liliae sardous* Giordani Soika, 1979  
Currently synonym of *Ancistrocerus renimaculus* (Lepeletier, 1841)
- 2PT *Ancistrocerus maculiscapus unimarginatus* Giordani Soika, 1974  
Note. The name on labels is “*Ancistrocerus unimarginatus*”.
- 1PT *Ancistrocerus maroccanus* Gusenleitner, 1977
- 3PT *Ancistrocerus monsticornis nigratus* Giordani Soika, 1988  
Currently synonym of *Subancistrocerus thalassarctos* (Dalla Torre, 1889)
- HT *Ancistrocerus ochraceus pictus* Giordani Soika, 1960
- 2PT *Ancistrocerus pakistanus* Giordani Soika, 1986  
Note. The name on labels is “*pachistanensis*”.
- 2PT *Ancistrocerus parapolo* Giordani Soika, 1966
- HT, 4PT *Ancistrocerus philippinus* Giordani Soika, 1996
- 3PT *Ancistrocerus reconditus* Gusenleitner, 1983
- 4PT *Ancistrocerus scoticus meridianus* Gusenleitner, 1977
- 1PLT *Ancistrocerus spilogaster* Cameron, 1905  
Note. The name on label is “*Eumenes spilogaster*”.
- 3PLT *Ancistrocerus stevensoni marginaticollis* Giordani Soika, 1939  
Currently synonym of *Ancistrocerus newillei newillei* (du Buysson, 1906)  
Note. The identification label mentions “*marginaticollis*” only.
- 1PT *Ancistrocerus striativentris elgonensis* Giordani Soika, 1960  
Note. The identification label mentions “*elgonensis*” only.
- 4PT *Ancistrocerus tibetanus* Giordani Soika, 1966
- HT *Ancistrocerus yamanei* Giordani Soika, 1986  
Currently synonym of *Ancistrocerus oviventris oviventris* (Wesmael, 1836)
- 1PT *Antamenes (Australochilus) ferrugineus* Giordani Soika, 1977  
Note. Gaster detached, head and five legs missing.
- 4PT *Antamenes (Australochilus) flavoniger* Giordani Soika, 1977  
Currently treated as *Australodynerus flavoniger* (Giordani Soika, 1977)
- 3PT *Antamenes (Australochilus) hackeri* Giordani Soika, 1962
- 2PT *Antamenes (Australochilus) hostilis* Giordani Soika, 1962
- 6PT *Antamenes (Australochilus) jugulatus* Giordani Soika, 1977
- HT *Antamenes tridens trifasciatus* Giordani Soika, 1994
- 4PT *Antamenes tridentatus* Giordani Soika, 1994
- 1PT *Antamenes unicornis* Giordani Soika, 1994
- 1PT *Antepipona aestimabilis* Giordani Soika, 1989
- 11PT *Antepipona albocincta* Giordani Soika, 1987
- 1PT *Antepipona albosignata* Gusenleitner, 1986
- HT, 4PT *Antepipona anonyma* Giordani Soika, 1985
- 1PT *Antepipona aprica* Giordani Soika, 1989
- 3PT *Antepipona aurantiaca* Giordani Soika, 1982  
Note. One specimen with gaster detached and glued on label.
- AT *Antepipona bhutanensis* Giordani Soika, 1975
- HT *Antepipona biguttata takaensis* Giordani Soika, 1982  
Currently synonym of *Antepipona biguttata* (Fabricius, 1787)
- 16PT *Antepipona cariniceps* Giordani Soika, 1979
- HT, 4PT *Antepipona celonitiformis* Giordani Soika, 1985
- 8PT *Antepipona consors* Giordani Soika, 1982
- 3PT *Antepipona convexiventris* Giordani Soika, 1987
- HT, AT, 2PT *Antepipona empeyi* Giordani Soika, 1985

- Note. The name on label is "*Muticomerus empeyi*".
- 7PT *Antepipona exaltata* Giordani Soika, 1982
- 2PT *Antepipona excelsa* Giordani Soika, 1982
- HT, AT, 2PT *Antepipona fatua* Giordani Soika, 1985  
 Note. Labelled as "*Muticodrynerus faunus*" (HT, AT) or "*Muticomerus faustus*" (2PTs), both unpublished names.  
 In collection as *Antepipona fatua* Giordani Soika 1985 and matching the data of the type series, hence apparently mislabeled specimens of the latter.
- 3PT *Antepipona frontalis* Giordani Soika, 1982
- HT *Antepipona gibbosissima* Selis, 2018
- 3PT *Antepipona guichardi* Giordani Soika, 1979
- 2PT *Antepipona hamoni* Giordani Soika, 1987
- HT, AT, 5PT *Antepipona hessei* Giordani Soika, 1985  
 Note. The name on labels is "*Muticomerus hessei*".
- 3PT *Antepipona injucunda* Giordani Soika, 1973  
 Currently synonym of *Antepipona biguttata* (Fabricius, 1787)  
 Note. The name on labels is "*O. injucundus*".
- 2PT *Antepipona irakensis* Giordani Soika, 1970
- HT, AT, 6PT *Antepipona jacoti* Giordani Soika, 1985
- 4PT *Antepipona jocosa tropicaloides* Giordani Soika, 1985
- HT *Antepipona karadgensis* Giordani Soika, 1970
- 1PT *Antepipona karibae angolensis* Giordani Soika, 1987
- 6PT *Antepipona kashmirensis* Giordani Soika, 1977  
 Note. One specimen missing genitalia.
- AT, 7PT *Antepipona liberator* Giordani Soika, 1985  
 Note. The name on labels is "*Muticomerus liberator*". Two of the specimens here listed as paratypes are labelled as "Allotypus" and "Holotypus" by AGS, but clearly not identifiable as such based on collecting data.
- HT, 4PT *Antepipona mamathensis* Giordani Soika, 1985
- 1PT *Antepipona menkei* Giordani Soika, 1986
- 3PT *Antepipona minor* Giordani Soika, 1985
- 3PT *Antepipona minutissima* Giordani Soika, 1982
- HT, 1PT *Antepipona nicotrae* Giordani Soika, 1985  
 Note. The name on labels is "*Muticomerus nicotrae*".
- 4PT *Antepipona nigrrior* Giordani Soika, 1985
- 1PT *Antepipona orbata* Giordani Soika, 1989
- 1PT *Antepipona osmania* Gusenleitner, 1986
- 3PT *Antepipona paglianoi* Giordani Soika, 1989
- 8PT *Antepipona paralastoroides* Giordani Soika, 1985
- AT, 14PT *Antepipona peregrinabunda* Giordani Soika, 1985  
 Note. The name on labels is "*Muticomerus peregrinabundus*".
- 3PT *Antepipona plurimacula* Giordani Soika, 1971  
 Note. The name on labels is "*plurimaculata*".
- HT *Antepipona praeclara* Giordani Soika, 1970
- HT *Antepipona prompta* Giordani Soika, 1970
- 5PT *Antepipona pruthii* Giordani Soika, 1982
- 5PT *Antepipona pseudosenex* Giordani Soika, 1985
- 1PT *Antepipona pulchellula* Giordani Soika, 1987
- HT, AT, 5PT *Antepipona scutellaris* Giordani Soika, 1985
- 2PT *Antepipona scutellaris pallidior* Giordani Soika, 1985
- 2PT *Antepipona sexfasciata* Giordani Soika, 1986
- 1PT *Antepipona shantungensis* Giordani Soika, 1993
- 2PT *Antepipona siamensis* Giordani Soika, 1982
- 2PT *Antepipona siamensis philippinensis* Giordani Soika, 1993

- HT, 5PT *Antepipona solstitialis frogna* Giordani Soika, 1985
- HT, 10PT *Antepipona sudanensis* Giordani Soika, 1985
- HT *Antepipona tricolorata* Selis, 2018
- HT, AT, 7PT *Antepipona verhoeffi* Giordani Soika, 1985
- 2PT *Antepipona vescovilis* Giordani Soika, 1970
- HT *Anterhynchium (Dirhynchium) astrophilum* Giordani Soika, 1996
- 2PT *Anterhynchium (Dirhynchium) coracinum* van der Vecht, 1963
- 1PT *Anterhynchium (Dirhynchium) flavomarginatum amamense* Tano, 1983
- 2PT *Anterhynchium (Dirhynchium) flavomarginatum flavonigrans* van der Vecht, 1963
- HT *Anterhynchium (Dirhynchium) flavopunctatum opulentum* Giordani Soika, 1973
- 2PT *Anterhynchium (Dirhynchium) hamatum* van der Vecht, 1963
- 1PT *Anterhynchium (Epidynerus) fulvipenne perpulchrum* van der Vecht, 1963
- 5PT *Anterhynchium (Epidynerus) fulvipenne venustum* van der Vecht, 1963
- 2PT *Anterhynchium (Epidynerus) kogimai* Giordani Soika, 1986  
Currently treated as *Okinawepipona kogimai kogimai* (Giordani Soika, 1986)
- 1PT *Anterhynchium flavomarginatum luctuosum* Giordani Soika, 1986  
Currently synonym of *Anterhynchium (Dirhynchium) flavomarginatum hanedai* Tano, 1983
- 1PT *Anterhynchium flavomarginatum sulphreum* Yamane, 1983
- 5PT *Anterhynchium nimbosum* Giordani Soika, 1987
- AT, 1PT *Anterhynchium synagroide cariosum* Giordani Soika, 1987
- 3PT *Anterhynchium uncatum bugandanum* Giordani Soika, 1987
- 2PT *Anterhynchium vastator* Giordani Soika, 1983  
Note. The name on label is “*Megapipona vastatrix*”.
- AT, 2PT *Antodynerus effossoides* Giordani Soika, 1989
- AT, 3PT *Antodynerus effossus* Giordani Soika, 1989
- 4PT *Antodynerus flavescens karachiensis* Giordani Soika, 1970
- HT *Antodynerus lobatus* Giordani Soika, 1983
- 3PT *Antodynerus sheffieldi bellatuloides* Giordani Soika, 1989
- HT, 1PT *Antodynerus somalicus* Giordani Soika, 1989
- HT *Antodynerus spoliatus ferruginatus* Giordani Soika, 1983
- HT *Apodynerus diffinis* Giordani Soika, 1996
- HT, 2PT *Apodynerus formosensis continentalis* Giordani Soika, 1994

 Currently treated as *Rhynchalastor miserrimus* (Giordani Soika, 1934)
- 3PLT ***Odynerus (Stenodynerus) posttegulatus*** Giordani Soika, 1937  
 Currently treated as *Acarodynerus posttegulatus* (Giordani Soika, 1937)
- 1PT ***Odynerus (Stenodynerus) spargovillensis*** Giordani Soika, 1937  
 Currently treated as *Acarodynerus spargovillensis* (Giordani Soika, 1937)
- 2PLT ***Odynerus (Tropidodynerus) variegatus semiticus*** Giordani Soika, 1952  
 Currently treated as *Tropidodynerus (Tropidodynerus) flavus semiticus* (Giordani Soika, 1952)
- 1PT ***Odynerus abdominalis*** Fox, 1902  
 Currently treated as *Hypancistrocerus abdominalis* (Fox, 1902)
- 2PT ***Odynerus acolhuus*** de Saussure, 1857  
 Currently treated as *Leptochilus (Zendalia) acolhuus* (de Saussure, 1857)
- 1ST ***Odynerus anceps albofasciatus*** von Schulthess, 1928  
 Currently synonym of *Tricarindodynerus anceps bequaerti* (Schouteden, 1919)
- 1ST ***Odynerus anceps totoniger*** von Schulthess, 1928  
 Currently treated as *Tricarindodynerus anceps totoniger* (von Schulthess, 1928)
- 1PT ***Odynerus angulatus alexandriae*** Giordani Soika, 1941  
 Currently treated as *Euodynerus (Euodynerus) angulatus alexandriae* (Giordani Soika, 1941)
- 1PLT ***Odynerus angulatus*** de Saussure, 1855  
 Currently treated as *Euodynerus (Euodynerus) angulatus angulatus* (de Saussure, 1855)
- AT ***Odynerus armatiscutis*** Cameron, 1910  
 Currently synonym of *Antepipona defracta* (du Buysson, 1906)
- 1PT ***Odynerus bicolor nigrocinctoides*** Giordani Soika, 1941  
 Currently treated as *Pseudabispa bicolor nigrocinctoides* (Giordani Soika, 1941)  
 Note. Labelled as “Typus” but actually designated as paratypus in the original description.
- 1PT ***Odynerus blackburni*** Kirby, 1880  
 Currently treated as *Nesodynerus blackburni* (Kirby, 1880)
- 2PT ***Odynerus bohollensis*** von Schulthess, 1934  
 Currently treated as *Stenodyneriellus bohollensis bohollensis* (von Schulthess, 1934)
- 1PT ***Odynerus burmanicus*** Bingham, 1897

- Currently treated as *Epsilon burmanicum* (Bingham, 1897)
- 2PLT ***Odynerus camurus*** Giordani Soika, 1938  
Currently treated as *Leptochilus (Euleptochilus) camurus* (Giordani Soika, 1938)
- 1PT ***Odynerus cauponalis*** Giordani Soika, 1977  
Currently synonym of *Odynerus (Spinicoxa) alexandrinus* de Saussure, 1853
- 1PT ***Odynerus ceylonicus*** de Saussure, 1867  
Currently treated as *Antepipona ceylonica* (de Saussure, 1867)
- 2ST ***Odynerus chartergoides*** von Schulthess, 1934  
Currently synonym of *Epsilon dyscherum* (de Saussure, 1853)  
Note. One specimen labelled as “Type”, the other as “Cotype”. The original description does not provide an holotypus designation.
- 1PT ***Odynerus coenocephalus*** Cameron, 1907  
Currently synonym of *Euodynerus (Pareuodynerus) trilobus* (Fabricius, 1787)
- 1PT ***Odynerus cyanoptyryx*** Perkins, 1899  
Currently treated as *Nesodynerus cyanoptyryx* (Perkins, 1899)
- 1ST ***Odynerus cyrenaicus*** von Schulthess, 1924  
Currently treated as *Chlorodynerus cyrenaicus* (von Schulthess, 1924)
- 1PT ***Odynerus decens*** Kostylev, 1940  
Currently treated as *Symmorphus (Symmorphus) decens* (Kostylev, 1940)  
Note. One specimen with label “This specimens probably has no type-status”, signed JMC [J. M. Cumming].
- 1PT ***Odynerus dernensis*** Gribodo, 1924  
Currently treated as *Odynerus (Monoplomerus) consobrinus dernensis* Gribodo, 1924  
Note. Labelled as paratype by AGS.
- AT ***Odynerus dietrichianus dietrichianus*** de Saussure, 1869  
Currently treated as *Acarodynerus dietrichianus dietrichianus* (de Saussure, 1869)
- 1PT ***Odynerus djarabubensis*** von Schulthess, 1928  
Currently treated as *Knemodynerus djarabubensis djarabubensis* (von Schulthess, 1928)
- 1PT ***Odynerus duplofasciatus*** von Schulthess, 1934  
Currently incertae sedis
- 1PT ***Odynerus ecostatus*** Perkins, 1899  
Currently synonym of *Nesodynerus halaekalae* (Blackburn, 1886)
- 1ST ***Odynerus enslini*** von Schulthess, 1928  
Currently synonym of *Euodynerus (Euodynerus) diversus* (Walker, 1871)
- 2PT ***Odynerus erubescens*** Bohart, 1940  
Currently incertae sedis
- 1PT ***Odynerus exoglyphus albovittatus*** Bohart, 1939  
Note. Type status uncertain. Labelled by Bohart as paratype of “*Odynerus exoglyphus nigrovittatus*”, which does not exist. As collecting data are matching those of the type series of *Odynerus exoglyphus albovittatus*, we believe that it is to be referred to this taxon.
- 5PT ***Odynerus exoglyphus*** Bohart, 1939  
Currently treated as *Euodynerus (Euodynerus) exoglyphus exoglyphus* (Bohart, 1939)
- 1ST ***Odynerus exilis*** de Saussure, 1853  
Name replaced by *Odynerus extranaeus* de Saussure 1855, currently valid as *Leptomenoides extranaeus* (de Saussure, 1855)  
Note. An ancient specimen labelled by AGS as AT of *O. extranaeus*, probably a true ST of *O. exilis*.
- 1PT ***Odynerus falkenhayni*** Dusmet, 1917  
Currently treated as *Leptochilus (Neoleptochilus) medanae falkenhayni* (Dusmet, 1917)
- 1PT ***Odynerus farias*** de Saussure, 1857  
Currently treated as *Stenodynerus farias* (de Saussure, 1857)
- 1PT ***Odynerus flammiger*** de Saussure, 1855  
Currently treated as *Flammodynerus flammiger flammiger* (de Saussure, 1855)
- 5ST ***Odynerus formosensis*** von Schulthess, 1934

Currently treated as *Apodynerus formosensis formosensis* (von Schulthess, 1934)

Note. Two of them having uncertain status: labelled as “*bipustuloides* det Schulthess [1]93[?]” (unpublished name?), bearing a “Cotype” label with no taxon stated on it, in collection as *formosensis* and collected from Kankau, which is mentioned among the collecting localities of the type series of *O. formosensis*).

- 2PLT ***Odynerus fouadi*** Giordani Soika, 1939  
Currently treated as *Syneuodynerus fouadi fouadi* (Giordani Soika, 1939)  
Note. One additional specimen labelled as Allotype but not belonging to the type series.
- 2PT ***Odynerus fukaianus*** von Schulthess, 1913  
Currently synonym of *Orancistrocerus drewseni drewseni* (de Saussure, 1857)
- 1PT ***Odynerus gestroi*** Dusmet, 1929  
Currently synonym of *Jucancistrocerus (Eremodynerus) saharensis* (Giordani Soika, 1934)
- 2PT ***Odynerus grenadensis*** Ashmead, 1900  
Currently synonym of *Pachodynerus guadulpensis* (de Saussure, 1853)
- 3PT ***Odynerus guichardi*** Giordani Soika, 1977
- 1PT ***Odynerus guttulatus nigridorsus*** van der Vecht, 1937  
Currently synonym of *Stenodyneriellus guttulatus* (de Saussure, 1862)
- LT ***Odynerus handschini*** von Schulthess, 1935  
Currently treated as *Ancistrocerus handschini* (von Schulthess, 1935)  
Note. Labelled “Lectoholotypus”.
- 2PT ***Odynerus heterochromus*** Perkins, 1899  
Currently treated as *Nesodynerus heterochromus* (Perkins, 1899)
- 1PT ***Odynerus hindeburgi*** Dusmet, 1917  
Currently treated as *Pseudosymmorphus hindenburgi* (Dusmet, 1917)
- 3PT ***Odynerus hostis*** Nurse, 1903  
Currently treated as *Tropidodynerus (Tropidepipona) hostis* (Nurse, 1903)
- 1PT ***Odynerus instabilis*** Perkins, 1899  
Currently synonym of *Nesodynerus ganahli* (Dalla Torre, 1904)
- 1PT ***Odynerus kalinowskii*** Radoszkowski, 1890  
Currently treated as *Stenodynerus chinensis kalinowskii* (Radoszkowski, 1890)  
Note. Type status uncertain. Only labelled as “Paratypus ?” by AGS.
- 2ST ***Odynerus kankauensis*** von Schulthess, 1934  
Currently treated as *Subancistrocerus kankauensis* (von Schulthess, 1934)  
Note. Originally labelled as Cotype. Labelled as paratype by AGS.
- 1PLT ***Odynerus kanthaleyensis*** Giordani Soika, 1935  
Currently synonym of *Epsilon burmanicum* (Bingham, 1897)
- LT ***Odynerus kolambuganensis*** von Schulthess, 1934  
Currently treated as *Parancistrocerus kolambuganensis* (von Schulthess, 1934)
- 2ST ***Odynerus kosempoensis*** von Schulthess, 1934  
Currently treated as *Paraleptomenes kosempoensis* (von Schulthess, 1934)
- 1PT ***Odynerus limbiferoides*** Giordani Soika, 1938  
Currently treated as *Leptochilus (Euleptochilus) limbiferoides* (Giordani Soika, 1938)
- 2PLT ***Odynerus lucens*** Kostylev, 1938  
Currently treated as *Symmorphus (Symmorphus) lucens* (Kostylev, 1938)
- AT ***Odynerus meridionalis*** de Saussure, 1862  
Currently treated as *Antodynerus meridionalis meridionalis* (de Saussure, 1862)
- 1PT ***Odynerus meyeri albolimbatus*** von Schulthess, 1914  
Currently treated as *Knemodynerus albolimbatus* (von Schulthess, 1914)
- 1PT ***Odynerus pedunculatus*** Saunders, 1905  
Note. The species is Currently treated as *Cyrtolabulus pedunculatus* (Saunders, 1905), but female specimens described by Saunders – including the present one - actually belong to *Microdynerus saundersi* Blüthgen, 1955
- 2PT ***Odynerus peles*** Perkins, 1899  
Currently treated as *Nesodynerus peles* (Perkins, 1899)

- 1PT ***Odynerus petrobii*** Perkins, 1899  
Currently treated as *Nesodynerus petrobii* (Perkins, 1899)
- 1PT ***Odynerus polyphemus*** Kirby, 1888  
Currently treated as *Knemodynerus polyphemus* (Kirby, 1888)
- 1PT ***Odynerus pseudochromus*** Perkins, 1899  
Currently treated as *Nesodynerus pseudochromus* (Perkins, 1899)
- 1PT ***Odynerus quadrinotatus*** Giordani Soika, 1986  
Currently synonym of *Stenodyneriellus wickwari* (Meade-Waldo, 1911)
- LT, 2PLT ***Odynerus samarensis*** von Schulthess, 1934  
Currently treated as *Parancistrocerus samarensis* (von Schulthess, 1934)  
Note: the two paralectotypes are also HT and PT of *Parancistrocerus yachowensis konkunesis* Giordani Soika, 1994
- 1PT ***Odynerus sauteri*** von Schulthess, 1934  
Currently treated as *Pararrhynchium ornatum sauteri* (von Schulthess, 1934)
- 2PT ***Odynerus sculpturatus*** Dover, 1925  
Currently treated as *Cyphodynerus sculpturatus* (Dover, 1925)
- 5PLT ***Odynerus seyrigi*** Giordani Soika, 1941  
Currently treated as *Antepipona seyrigi* (Giordani Soika, 1941)
- 2PT ***Odynerus sociabilis*** Perkins, 1899  
Currently treated as *Nesodynerus sociabilis* (Perkins, 1899)
- 1PT ***Odynerus sutterianus*** de Saussure, 1875  
Currently synonym of *Ancistrocerus tuberculocephalus* (de Saussure, 1852)
- AT ***Odynerus tachkensis*** Dalla Torre, 1889  
Currently treated as *Jucancistrocerus (Jucancistrocerus) tachkensis* (dalla Torre, 1889)
- 2PT ***Odynerus timidus robustus*** Dusmet, 1903  
Currently treated as *Microdynerus (Microdynerus) robustus* (Dusmet, 1903)
- 1PT ***Odynerus toltecus*** de Saussure, 1857  
Currently treated as *Parancistrocerus toltecus* (de Saussure, 1857)
- 1PT ***Odynerus totonacus*** de Saussure, 1857  
Currently treated as *Parancistrocerus totonacus* (de Saussure, 1857)
- 2PT ***Odynerus transcaspicus*** Kostylev, 1935  
Currently treated as *Stenancistrocerus (Paratropancistrocerus) transcaspicus* (Kostylev, 1935)
- 1PT ***Odynerus vittativentris*** Perkins, 1899  
Currently treated as *Nesodynerus vittativentris* (Perkins, 1899)
- 1PT ***Odynerus wagneri*** du Buysson, 1905  
Currently incertae sedis
- 1PT ***Odynerus waldenii*** Viereck, 1906  
Currently treated as *Ancistrocerus waldenii waldenii* (Viereck, 1906)
- 1PT ***Odynerus xanthozonus*** Cameron, 1908  
Currently treated as *Ancistrocerus xanthozonus* (Cameron, 1908)
- 2PT ***Odynerus xanthus*** Cameron, 1907  
Currently treated as *Chlorodynerus xanthus* (Cameron, 1907)  
Note. One paratype only bearing a “Paratype” label but missing an identification label.

 Currently treated as *Apodynerus gregaroides* (Giordani Soika, 1986)
- HT, 3PT ***Pachymenes obscurus consuetus*** Giordani Soika, 1990  
 Currently treated as *Pachymenes consuetus* Giordani Soika, 1990
- 1PT ***Pachymenes obscurus orellanoides*** Giordani Soika, 1990  
 Currently synonym of *Pachymenes consuetus* Giordani Soika, 1990  
 Note. The specimen was labelled as holotype by AGS, but based on the original description it is clearly recognized as paratype.
- 7PT ***Pachymenes oreallnae vardyi*** Giordani Soika, 1990  
 Currently synonym of *Pachymenes orellanae* (Schulz, 1905)
- LT ***Pachymenes pseudoneotropicus*** Giordani Soika, 1943  
 Currently treated as *Antamenes (Antamenes) pseudoneotropicus* (Giordani Soika, 1943)
- HT ***Pachymenes rectispina*** Giordani Soika, 1943  
 Currently synonym of *Antamenes (Antamenes) vernalis* (de Saussure, 1853)
- 1ST ***Pachymenes santanna*** de Saussure, 1857
- HT ***Pachymenes schneideri*** Giordani Soika, 1943  
 Currently treated as *Irianmenes schneideri* (Giordani Soika, 1943)
- LT ***Pachymenes tasmaniae*** Giordani Soika, 1943  
 Currently treated as *Antamenes (Antamenes) tasmaniae* (Giordani Soika, 1943)  
 Note. Labelled as holotype, but actually the lectotype.
- 1PT ***Pachymenes troglodytes baliensis*** Giordani Soika, 1987  
 Currently synonym of *Apodynerus troglodytes troglodytes* (de Saussure, 1855)
- 1PT ***Pachymenes ventricosus*** de Saussure, 1852  
 Currently treated as *Gamma ventricosum ventricosum* (de Saussure, 1852)
- 1PT ***Pachymenes viridis*** Smith, 1859  
 Currently treated as *Eudiscoelius viridis* (Smith, 1859)
- LT, 1PLT ***Pachymenes vorticosus*** Giordani Soika, 1943  
 Currently treated as *Antamenes (Antamenes) vorticosus* (Giordani Soika, 1943)

- LT *Rhynchium abyssinicum albicauda* von Schulthess, 1923  
Currently treated as *Synagris (Pseudagris) albicauda* (von Schulthess, 1923)
- 2PT *Rhynchium atrissimum* van der Vecht, 1968
- 1PT *Rhynchium auratiacum* Cameron, 1908  
Currently synonym of *Knemodynerus excellens* (Pérez, 1907)
- HT, 10PT *Rhynchium brunneum ceylonicum* Giordani Soika, 1994
- 1PT *Rhynchium carbonarium* de Saussure, 1857  
Currently synonym of *Pachodynerus cinerascens* (Fabricius, 1775)  
Note. Type status uncertain, labelled “Paratypus ?”.
- 9PT *Rhynchium claripenne* Giordani Soika, 1994
- 12PT *Rhynchium cyanopterum assabense* Giordani Soika, 1987  
Note. The name on labels is “*assabensis*”. One specimen labelled “*cyanopterum assabensis*” on label by AGS.  
Nine paratypes labelled as “*assabensis aenigm.*”.

- HT, 2PT ***Rhynchium cyanopterum somaliense*** Giordani Soika, 1987
- 1ST ***Rhynchium distinguendum*** du Buysson, 1913  
Currently treated as *Rhynchium oculatum distinguendum* du Buysson, 1913  
Note. Originally labelled as “type”, subsequently labelled as “paratypus” by AGS.
- 1PT ***Rhynchium flavopunctatum tsushimarum*** Yasumatsu, 1935  
Currently treated as *Anterhynchium (Dirhynchium) flavomarginatum tsushimarum* (Yasumatsu, 1935)
- 2ST ***Rhynchium gribodoi*** von Schulthess, 1922  
Currently treated as *Antodynerus gribodoi* (von Schulthess, 1922)  
Note. In addition to the two specimens labelled as “Cotype”, an additional specimen identified von Schulthess and labelled “Type”, but not belonging to the type series.
- HT, AT, 1PT ***Rhynchium haemorrhoidale samurayi*** Giordani Soika, 1973  
Currently treated as *Rhynchium quinquecinctum samurayi* Giordani Soika, 1973
- 2ST ***Rhynchium neavei*** von Schulthess, 1922  
Currently synonym of *Rhynchium marginellum sabulosum* de Saussure, 1855  
Note. One additional specimen labelled as “Type” label by von Schulthess but not belonging to the type series.
- 3PT ***Rhynchium nigrosericeum*** Giordani Soika, 1989
- 2PLT ***Rhynchium oculatum adenense*** Giordani Soika, 1952
- 2PLT ***Rhynchium oculatum hebraeum*** Giordani Soika, 1952
- 1PT ***Rhynchium oculatum ibericum*** Giordani Soika, 1966  
Currently synonym of *Rhynchium oculatum oculatum* (Fabricius, 1781)
- 1PT ***Rhynchium ornatum*** Smith, 1852  
Currently treated as *Pararrhynchium ornatum ornatum* (Smith, 1852)
- 1PT ***Rhynchium quinquecinctum murotai*** Tano, 1983
- 1PT ***Rhynchium quinquecinctum nambui*** Yaamane, 1983
- 1PT ***Rhynchium radiale*** de Saussure, 1855  
Currently treated as *Antodynerus radialis radialis* (de Saussure, 1855)
- 9PT ***Rhynchium rubropictum nigriventre*** Giordani Soika, 1994
- HT, 2PT ***Rhynchium rubropictum tenimberense*** Giordani Soika, 1994
- 1ST ***Rhynchium schubotzianus*** von Schulthess, 1913  
Currently treated as *Tricarindodynerus schubotzianus* (von Schulthess, 1913)
- 1PT ***Sphaeromenes discrepatus*** Giordani Soika, 1978
- HT, AT, 5PT ***Stellepipona brevicornis*** Giordani Soika, 1987
- HT, 1PT ***Stellepipona empeyi*** Giordani Soika, 1973  
Currently synonym of *Stellepipona guillarmodi* Giordani Soika, 1973
- HT, 3PT ***Stellepipona guillarmodi*** Giordani Soika, 1973
- HT ***Stellepipona invida*** Giordani Soika, 1987
- HT, 1PT ***Stellepipona lamellata*** Giordani Soika, 1987
- HT, 1PT ***Stellepipona ochraceotincta*** Giordani Soika, 1987
- HT, AT, 2PT ***Stellepipona pilosissima*** Giordani Soika, 1987
- 1PT ***Stellepipona stellenboschensis nigricolor*** Giordani Soika, 1989  
Currently treated as *Stellepipona aequinoxialis nigricolor* Giordani Soika, 1989
- 1PT ***Stenochilus longithorax*** Giordani Soika, 1987  
Currently treated as *Aethiopicodynerus longithorax* (Giordani Soika, 1987)
- HT ***Stenodyneriellus apicatimimus*** Giordani Soika, 1996
- HT, AT, 7PT ***Stenodyneriellus birostratus*** Giordani Soika, 1994
- 5PT ***Stenodyneriellus bistrigatus*** Giordani Soika, 1994
- 1PT ***Stenodyneriellus boholensis planus*** Giordani Soika, 1994
- 2PT ***Stenodyneriellus brisbanensis*** Giordani Soika, 1962
- HT ***Stenodyneriellus carinicolis minimus*** Giordani Soika, 1994
- 1PT ***Stenodyneriellus carnavonensis*** Giordani Soika, 1977
- 5PT ***Stenodyneriellus cilicioides*** Giordani Soika, 1994
- 1PT ***Stenodyneriellus clypearis*** Giordani Soika, 1994

- 1PT *Stenodyneriellus convexus bismarcki* Giordani Soika, 1994  
5PT *Stenodyneriellus convexus* Giordani Soika, 1993  
2PT *Stenodyneriellus convexus irianus* Giordani Soika, 1994  
1PT *Stenodyneriellus darnleyensis* Giordani Soika, 1977  
Note. The name on label is “*tricoloratus darnleyensis*”.
- 6PT *Stenodyneriellus flaviventris* Giordani Soika, 1994  
4PT *Stenodyneriellus flaviventris obscurus* Giordani Soika, 1994  
1PT *Stenodyneriellus flavoclypeatus* Giordani Soika, 1994

- LT, 2PLT *Synagris (Rhynchagris) mediocarinata* Giordani Soika, 1944
- 1ST *Synagris similis maculata* Maidl, 1914
- 1PT *Syneodynerus cylindrellus* Giordani Soika, 1993
- 1PLT *Tachyancistrocerus aereus* Giordani Soika, 1952  
 Note. The name on label is “*Subancistroc. aereus*”.
- 1PT *Tachyancistrocerus antiquus* Giordani Soika, 1970
- 2PT *Tachyancistrocerus pallidenotatus* Giordani Soika, 1970
- 6PT *Tachyancistrocerus quabosi* Giordani Soika, 1979
- HT, 1PT *Trachodynerus dancaliensis* Giordani Soika, 1989  
 Currently treated as *Knemodynerus dancaliensis* (Giordani Soika, 1989)
- HT *Trachodynerus sauditus* Giordani Soika, 1989  
 Currently treated as *Knemodynerus sauditus* (Giordani Soika, 1989)
- HT *Tricarinynerus rufiflavus somalus* Giordani Soika, 1989
- 1PT *Xanthodynerus jordanicus* Giordani Soika, 1990
- HT *Xanthodynerus tripunctatus* Giordani Soika, 1989
- 1PT *Zeta argillaceum apurimacensis* Giordani Soika, 1975  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)
- AT, 2PT *Zeta argillaceum distinguendum* Giordani Soika, 1975  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)
- 7PT *Zeta argillaceum incarum* Giordani Soika, 1975  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)
- 2PT *Zeta argillaceum pallidior* Giordani Soika, 1975  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)
- AT, 6PT *Zeta argillaceum peruense* Giordani Soika, 1975  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)  
 Note. The name on labels is “*peruensis*”.
- 4PT *Zeteumenes argillaceum hubrichi* Giordani Soika, 1969  
 Currently synonym of *Zeta argillaceum* (Linnaeus, 1758)

- Note. The name on labels is “*canaliculatus hubrichi*”.
- 1PT ***Zetheumenidion femoratus flavissimus*** Giordani Soika, 1987  
Currently spelled *Zetheumenidion femoratum flavissimum* Giordani Soika, 1987
- 1PT ***Zethus (Calligaster) ceylonicus*** de Saussure, 1867  
Currently treated as *Zethus (Zethastrum) ceylonicus* de Saussure, 1867
- 1PT ***Zethus (Zethus) chimorum*** Bohart & Stange, 1965
- HT, AT, 10PT ***Zethus (Zethus) empeyi*** Giordani Soika, 1979  
Currently treated as *Zethus (Madcazethus) empeyi* Giordani Soika, 1979  
Note. The spelling on all labels is “*empeyanus*”, but specimens are clearly corresponding to those described as “*empeyi*”.
- HT ***Zethus (Zethus) intermedius*** Selis, 2018  
Currently treated as *Zethus (Madcazethus) intermedius* Selis, 2018
- HT ***Zethus (Zethus) senegalensis*** Giordani Soika, 1979  
Currently treated as *Zethus (Madcazethus) senegalensis* Giordani Soika, 1979  
Note. Only bearing a label stating type status, but missing an identification label. Identity attributed by its original position, near a typewritten identification label attached to the bottom of the drawer.
- HT ***Zethus (Zethus) soikai*** Selis, 2017  
Currently treated as *Zethus (Madcazethus) soikai* Selis, 2017
- 8PT ***Zethus (Zethus) yarrowi*** Giordani Soika, 1979  
Currently treated as *Zethus (Madcazethus) yarrowi* Giordani Soika, 1979
- HT ***Zethus aethiopicus*** Giordani Soika, 1940
- HT? ***Zethus bakeri*** Giordani Soika, 1995  
Note. The identity of the holotype is doubtful. It was labeled by AGS as “*Zethus convexus*”, which is an unpublished name, and seems to match the description of *Z. bakeri*. The holotype of *Zethus bakeri* was not found in the AGS collection, where it was supposed to be found according to the original description.
- HT ***Zethus bilaminatus*** Giordani Soika, 1940
- 1PT ***Zethus brooksi*** Giordani Soika, 1992
- 2PT ***Zethus chicotencatl*** de Saussure, 1857  
Currently synonym of *Zethus (Zethus) fuscus* (Perty, 1833)
- 1PT ***Zethus interstitialis*** Cameron, 1902  
Currently treated as *Cyrtolabulus interstitialis* (Cameron, 1902)
- HT ***Zethus luzonensis*** Giordani Soika, 1941
- 1PT ***Zethus mandibularis*** Giordani Soika, 1995
- 1PT ***Zethus matzicatzin*** de Saussure, 1857  
Note. Missing gaster.
- 1PT ***Zethus montezuma*** de Saussure, 1857
- HT, AT, 1PT ***Zethus rhodesianus*** Giordani Soika, 1940
- HT ***Zethus seyrigi*** Giordani Soika, 1940
